PROVIDER'S INSPECTION
SUMMARY REPORT

Provider's Name: Early Head Start Program Physical Address: Dan Dan
Infant/Toddler

Contact Person: Lathania A. Santos

Contact Number: 288-5633/664-3751

Category(s): √ Center Base

Group Home:

Date of Assessment: September 22, 2016

Assessed By: Leilani I. Marciano
CCLP-Safety Inspector

Witness: Gregoria O. Somol –eligibility worker

Type of Assessment: Preliminary Renewal Announced Unannounced √

CCLP#: 991-(2) Date of issued: 7/14/2016 Expiration Date: 4/13/2017 Capacity: 8

Staff Child Ratio

- The Provider meet the Staff Child Ratio for the Infant Toddler Room. **Nothing to report for any discrepancy or violations.**

(1) Electrical

- The facility complies on all the electrical safety aspects. **Nothing to report for any discrepancy or violations.**

(2) Signage

- The NO SMOKING SIGNS and EXIT SIGNS are visible and posted on proper designated areas. **Nothing to report for any discrepancy or violations.**

(3) Emergency

The discrepancy

- **No Emergency Evacuation Exits plan posted on the 2nd exit door.**

(4) Sanitary

- The facility is odor free, practicing sanitizing continuously prevention from any bacteria. Clean towels are provided and being replaced daily as well as soap dispenser is readily available. **Nothing to report for any discrepancy or violations.**

THE UNIVERSITY OF CHICAGO
DEPARTMENT OF CHEMISTRY
LABORATORY OF ORGANIC CHEMISTRY

1. The first step in the synthesis of the target molecule is the reaction of the starting material with the reagent to form the intermediate. This reaction is carried out under the following conditions: [faded text]

2. The intermediate is then purified by column chromatography using silica gel and a gradient of ethyl acetate in hexanes. The fractions are collected and the solvent is removed under reduced pressure to yield the pure intermediate.

3. The final step is the conversion of the intermediate to the target molecule. This is achieved by reacting the intermediate with the appropriate reagent under the following conditions: [faded text]

4. The target molecule is then purified by recrystallization from a suitable solvent. The mother liquor is evaporated and the crystals are dried under high vacuum to yield the pure target molecule.

5. The yield of the target molecule is approximately [faded text]%. The melting point is [faded text]°C.

6. The structure of the target molecule is confirmed by [faded text] NMR spectroscopy. The chemical shifts and integrations are consistent with the proposed structure.

7. The target molecule is a colorless solid with a molecular weight of [faded text]. It is stable to air and light.

8. The target molecule is used in the synthesis of [faded text]. It is a key intermediate in the synthesis of [faded text].

9. The target molecule is a [faded text] derivative. It is a [faded text] compound.

10. The target molecule is a [faded text] derivative. It is a [faded text] compound.

(5) Outdoor

- The facility outdoor playground is safe for children enrolled at the Facility to utilized as well as fenced and gated. *Nothing to report for any discrepancy or violations.*

(6) Capacity

- The outdoor facility for this Provider complies with the required square footage of space per child. *Nothing to report for any discrepancy or violations.*
