**Loving Hands Daycare
Areas for Recommendations (05.04.23)**

#	Area(s) to Address: (e.g. health and safety topic; QRIS star level indicator)	Observation	Recommendation	Action taken
1	(6-A) Daily health checks are conducted for all children upon arrival.	No entry for the day for 6 children in the preschool 1 room. No entry for all (16) afterschool children present. The last entry in the preschool room was dated May 01(Monday) and May 03 (Wednesday) for the afterschool.	Advised the director to make sure that daily health checks are conducted for all children upon arrival and to ensure that forms are up to date.	Daily Health check were conducted for all children present during the follow-up visit.
2	Building & Physical premises safety	The diapering table in the younger infant area does not have any cushion, it only has a mat-like covering on top. The cushion used on the diapering table in the older infant area is old and in poor condition – the outer covering is just taped onto the back or bottom part.	Recommended to add a diapering mat to serve as a cushion on top of the diapering table so that the surface will not be too hard on the baby being changed. For best/ quality practices, the cushion in use must be replaced with a new, and more appropriate one.	Added a temporary diapering mat that serves as a cushion on top of the diapering table. The old cushion used on the diapering table was replaced with a temporary mat (non-porous cover), while waiting for the new one.
3	Prevention & Control of Infectious Diseases	The used feeding bottles in the infant's individual basket are uncovered and unrinsed, some are even mixed with other things in the basket (i.e. clean bottles, bib, food and rattles).	For best/quality practices it is recommended to rinse all bottles after each use and place them in the infant's bag so that teachers will not be confused over which are clean or dirty. Dirty bottles should also not be mixed with clean bottles or food. Also, avoid putting other things in the basket, such as toys and bibs.	Program provided clarification that rinsing of used feeding bottles is not part of their practices. However, during the follow up visit, used feeding bottles and other objects, such as toys and bibs, were no longer placed in the same containers as

				the cleaned bottles, formula and food.
4	OTHERS: Use of restrictive Device & Safe sleep practices	Infant was placed in restrictive furniture in the play area of the infant room. Also observed that an infant was sleeping in the device.	For quality practices, the use of any restrictive devices is discouraged because it limits the activity of the infant and also his/ her access to materials. Regarding safe sleep practices, infants who fall asleep outside their cribs must be transferred to the crib/ safe sleep equipment immediately.	The restrictive device was no longer present on the infant room.
